

KRUNALKUMAR SHAH

AI & Workflow Automation Engineer · Software Engineer · Cybersecurity Consultant · Technical Mentor

Surendranagar, Gujarat, India | Remote/Hybrid | +91 82007 13617 | einstein1410@gmail.com

Portfolio: krunalkumar.dpdns.org | LinkedIn: linkedin.com/in/realkrunalkumar | GitHub: github.com/officialkrunalkumar

PROFESSIONAL SUMMARY

Software engineer, published security researcher, and mentor delivering for companies across the USA, France, Taiwan, and India since 2020 — now consulting independently on AI workflows, automation, and cybersecurity.

- Conceived and shipped **ChurnGPT**, a production multi-stage AI churn-analysis pipeline, at Zeni AI.
- Built production CRM automations and integrations connecting HubSpot with Mixpanel, Chargebee, Slack, and Google Sheets (n8n, Make, Google Apps Script).
- Conducted **5,000+ technical interviews** (2021–2023); rated **5.0/5.0** from 163 reviews across 204 Codementor sessions.
- Published a peer-reviewed Linux security paper (IJRAT, 2019) — **IAENG Best Paper Award nominee**.

Open to: AI & workflow automation engineering, software engineering, revenue/business operations engineering, cybersecurity consulting, and developer education/technical mentorship roles — remote or hybrid.

CORE SKILLS

Programming: Python, JavaScript, TypeScript, C, C++, Java, SQL, shell scripting (Bash)

AI & Workflow Automation: AI agents & LLM pipelines, workflow automation (n8n, Make, Zapier, Google Apps Script), prompt engineering, no-code/low-code integrations, sales-engagement automation (Instantly, SmartLead, Lemlist)

Web & APIs: Full-stack web development, REST API design & integration, Flask, HTML, CSS

Cybersecurity: Vulnerability assessment, security reviews & hardening, Linux security, account-compromise recovery, security awareness training

Data & CRM: HubSpot (CRM administration), RevOps automation, PostgreSQL, MySQL, Mixpanel, Chargebee, data deduplication, ClickUp & Google Workspace automation

Platforms & Tools: Linux (all major distributions), AWS, GCP, Git (GitHub/GitLab), server monitoring

Quality & Process: Unit/automation/API testing, Agile & Scrum, SDLC/STLC, code reviews, technical interviewing, SEO

ENGINEERING & CONSULTING EXPERIENCE

Some roles across both experience sections ran concurrently — each entry is labeled with its engagement type, so overlapping dates are by design.

Independent Consultant — Self-employed · Remote (MSME-registered May 2026) May 2025 – Present

- Deliver fixed-scope consulting for tech and EdTech clients, including Folio (USA) — security reviews and hardening of web applications and Linux systems, AI agent pipelines, and CRM/data-sync integrations (n8n, Make, HubSpot, Google Apps Script) — quoted in writing and, where client work allows, delivered in the open on GitHub.
- Run outbound-campaign automation for client sales teams across Instantly, SmartLead, and Lemlist.
- Open-sourced CleverResponder, an AI SDR built in n8n for SmartLead and Instantly campaigns: classifies reply intent, drafts responses grounded in a client-controlled knowledge document, and sends only after human approval in Slack.
- Founded a selective free internship program (2–3 seats per cohort) where early-career engineers ship real client projects, alongside an open paid mentorship track — weekly 1:1s, code reviews, and interview preparation.

Technical Interviewer (Industry Mentor Expert) — Coding Ninjas, India (Part-time, Remote) Jun 2025 – Apr 2026

- Conducted structured mock interviews for MERN-stack (MongoDB, Express.js, React, Node.js) developers, assessing problem solving and interview readiness with clear, actionable feedback.

Revenue Operations Analyst — Zeni AI, Pune, India (Full-time) Jul 2024 – May 2025

- Conceived and shipped ChurnGPT, introducing AI-assisted churn analysis to the revenue organization — a multi-stage pipeline that ingests company records, support tickets, and meeting notes, validates churn reasons, and recommends retention actions.
- Administered HubSpot CRM: built and maintained production workflows and integrations syncing HubSpot with Mixpanel, Chargebee, Slack, and Google Sheets (n8n, Make, Google Apps Script), including domain-based company deduplication.
- Built the team's process documentation and Lucidchart diagram libraries, turning undocumented institutional knowledge into maintainable, onboarding-ready material.

Software Engineering Mentor — MountBlue Technologies, India (Full-time, Remote) May 2021 – Sep 2023

- Conducted 5,000+ live technical interviews and code reviews (2021–2023, across MountBlue and concurrent consulting for US firms) while training cohorts of entry-level engineers in full-stack web development, automation, and API testing.

Developer & Cybersecurity Expert — IPEOS I-Solution, France (Full-time, Remote) Jan 2021 – May 2021

- Delivered full-stack web development and strengthened application security across the company's products — hired directly by a stakeholder impressed by earlier work.

SELECTED PROJECTS

Four highlights from the 35-project portfolio — full gallery: krunalkumar.dpdns.org/projects · code: github.com/officialkrunalkumar

- **AI-Powered FNOL Claims Assistant** — insurance-claims workflow that extracts claim data, detects missing fields, and routes each claim to the next step without manual triage.
- **Social Publishing Automation Studio** — Flask app + n8n workflows that automate an end-to-end content-distribution pipeline, from preparation to posting.
- **HubSpot Metadata Builder from Sheets** — Google Apps Script tool that provisions HubSpot properties and workflows from sheet-driven input.
- **Sheet-Driven Task Automation Hub** — Google Apps Script integration that turns spreadsheet updates into ClickUp tasks.

TEACHING & MENTORSHIP EXPERIENCE

Assistant Professor — C U Shah University, Surendranagar, India (Full-time) Jan 2024 – Jun 2024

- Taught courses in Operating Systems, Information Security, Programming, and Databases; established programming labs and led hands-on sessions for undergraduate engineering students.

Teaching Assistant — Correlation One, USA (Full-time consulting, Remote) Jan 2023 – Jan 2024

- Supported adult learners through technology training programs sponsored by Amazon (Career Choice Program).

Software Engineering Mentor — Springboard, San Francisco, USA (Part-time, Remote) Jun 2022 – Feb 2024

- Mentored fellows through the Software Engineering Career Track — weekly 1:1 guidance, project reviews, and career preparation; featured in the Mentor Spotlight for mentorship excellence.

Coding Mentor — Codementor, Taiwan (Part-time, Remote) Sep 2021 – May 2022

- Maintained a 5.0/5.0 rating (163 reviews) across 204 paid sessions delivering on-demand debugging, code reviews, and coaching in C, C++, Python, Java, Linux, and shell scripting.

Subject Matter Expert & Tutor — Chegg, USA (Part-time, Remote) Sep 2020 – Jan 2021

- Taught computer science, programming, networking, and information security through Expert Q&A and tutoring.

RESEARCH & PUBLICATIONS

“Security Against Fork Bomb Attack in Linux Based Systems” (with Krunal V. Patel) — International Journal of Research in Advent Technology (IJRAT), Vol. 7, No. 4, 2019. DOI: 10.32622/ijrat.74201911. Nominated for the IAENG Best Paper Award in Linux research. Proposed a defense against fork-bomb denial-of-service (DoS) attacks — name-based detection combined with process resource quarantine — that identified attacks in as little as 44 ms at a 500-fork threshold (evaluated on Xubuntu 18.04), eliminating the permanent false positives of blacklist approaches.

EDUCATION

M.E. Information Technology (Information Security) — Gujarat Technological University, 2019 · CPI 8.58/10 · **Silver Medalist** (ranked 2nd in college)

B.E. Computer Engineering — Gujarat Technological University, 2017 · CGPA 8.24/10 · Ranked 1st in college

H.S.C. — Science A Group, 2013 · 74.23% (88.50 percentile)

S.S.C. (I.C.S.C.), 2011 · 88.50% (96.20 percentile)

CERTIFICATIONS

Google IT Automation with Python · Google IT Support Specialization · IBM Cybersecurity Analyst · Systems Security Certified Practitioner (SSCP), ISC2 · IBM Data Analyst · Cybersecurity Specialization, University of Maryland · Palo Alto Networks Cybersecurity Specialization · Fortinet NSE 1 & NSE 2 · Open Source Software Development, Linux and Git, The Linux Foundation · Six Sigma Green Belt, University System of Georgia
